AsteRx-m™

Compact low-power dual-frequency GPS/GLONASS Receiver

Ultra low power, smaller than credit card GPS/GLONASS dual-frequency RTK receiver, for integration in hand-held devices, mobile computing platforms and other space-constrained applications requiring high accuracy and low-power consumption.

Unique compact low-power RTK receiver
Measuring only 70 by 48 mm, the AsteRx-m provides cm-level dual-frequency GPS RTK operation at less than 500 mW, and dual-frequency GPS/GLONASS RTK positioning at less than 600 mW. It is fully scalable from L1-only positioning to L1/L2 GPS/GLONASS operation.

World-class performance with GNSS+
AsteRx-m offers innovative tracking and positioning algorithms designed for demanding industrial environments, including:
• APME+ code and phase multipath mitigation technology
• Track+ for robust tracking under weak signal conditions such as under foliage
• RTK+, a novel, multi-system cm-accurate positioning engine using innovative real-time modeling of GNSS errors and a new mixed-mode fixing approach for robust performance and high availability in difficult environments
• GLO+, a special ultra precise GLONASS bias calibration method to increase accuracy, robustness and compatibility

Easy to integrate
Two antenna connectors are available; one can be connected to an internal antenna, while connecting a high-grade external antenna remains possible. A compact I/O connector allows integration in slim devices. The board is fully shielded to help avoid EMI issues. An extensive set of commands and data messages provides the integrator with full flexibility.

A comprehensive GNSS SW-toolset
RxTools provides an intuitive GUI (RxControl) for receiver configuration and remote control. Various tools for mission planning, data logging, replay and analysis, reporting, and more are included.

Key Features
• Unique compact GPS/GLONASS RTK receiver
• Industry leading low power consumption (600mW at full operation)
• cm-level positioning accuracy
• Special GNSS+ algorithms for robust industrial performance
• Full EMI shielding
• Easy to integrate, incl. extensive and well documented interface language
• A comprehensive GNSS SW-toolset
### Features
- Dual-frequency L1/L2 code/carrier tracking of GPS and GLONASS signals.
- 132 hardware channels for simultaneous tracking of all visible satellites in GPS and GLONASS constellations.
- GNSS+ pack containing APME+, Lock+ and RTK+, AIM+ and ATrack+.
- Positioning modes: stand-alone, SBAS, DGNSS, RTK, PPP.
- Includes up to 3 SBAS channels (EGNOS, WAAS, other).
- RAIM included.
- Raw data output (code, carrier, navigation data).
- 25 Hz data output rate (user selectable).
- 3 high-speed serial ports.
- NMEA v2.30 output format, up to 10 Hz.
- 2 antenna connectors (internal/external antenna) with automatic external antenna detection.
- 3 high-speed serial ports.
- 1 full speed USB port.
- Highly compact and detailed Septentrio Binary Format (SBF) output.
- RTCM v2.2, 2.3, 3.0 or 3.1.
- CMR,2.0 and CMR+.
- Includes intuitive GUI (RxControl) and detailed operating and installation manual.

### Other Septentrio Products

- **AsteRx2e/2el** - Compact dual-frequency GPS/GLONASS receiver platform, offering top-quality GPS code and carrier phase data and dual-frequency positioning (including DGPS, RTK and PPP (AsteRx2e/2el)) at up to 25 Hz.
- **AsteRx3** - A multi-frequency GPS/GLONASS/GALILEO receiver for demanding industrial applications, featuring precise RTK with extended baselines, advanced multipath and interference mitigation and exceptional tracking stability under high vibration conditions.

### Open Source

[Open Source](https://www.septentrio.com) - Open source projects for Septentrio receivers.

[Website](https://www.septentrio.com) - Septentrio website for more information.

---

** RxMobile - A unique single-board dual-frequency multi-antenna GPS/GLONASS receiver in a waterproof aluminium housing, that can be connected to 2 antennas for various machine control, heading and other multi-antenna applications.

**AsteRx2e** - IMU assisted Compact Dual-frequency GNSS receiver platform, offering a 36Hz RTK position based on integrated IMU and GNSS measurements. In addition at-titude information such as heading, pitch and roll are pro-vided even in shadowed environments where conventional GNSS receivers fail.

**PolaRx** - A multi-frequency multi-constellation receiver dedicated to ionospheric monitoring and space weather applications.

**PolaRx2** - A set of lightweight sturdy high precision antennas for geodetic, survey and machine control applications. Available in single-frequency GPS/GLONASS or multi-frequency GPS/GLONASS/GALILEO/COMPASS.

**PolaRxS** - A LEO receiver for demanding industrial applications, featuring exceptional tracking performance and carrier phase data and dual-frequency positioning (including DGPS, RTK and PPP).

**RxTools** - A suite of software applications for easy control of PolaRx and AsteRx receivers, and for easy manipulation, analysis and reporting of the data generated with these receivers.

**RxMobile** - A unique intuitive, portable GUI field controller for the Septentrio receivers. RxMobile allows controlling the receiver, monitoring the navigation solution and accessing its functions in the field in the same intuitive way as with RxControl.
